The applicant Santa Fe Pacific Gold Corporation			
P.O.Box 69 Street and No. or P.O. Box No. City or Town			
Nevada 89414 hereby make application for permission to change the			
Point of Diversion, Place of Use and Manner of Use of a Portion			
Point of diversion, manner of use, and/or place of use #52046 for DW-8 of water heretofore appropriated under #52046 for DW-8 Identify a victim right by Remit Configure Proof or Claim No. 15 Decreed alive title of Decree and			
identity existing right by Fernitt, Continuate, 1700) of Claim 100. If Defect, give the of Defect and			
identify right in Decree.			
1. The source of water is <u>underground</u> Name of stream, lake, underground spring or other source.			
2. The amount of water to be changed 2.0 cfs Second feet, acre feet. One second foot equals 448.83 gallons per minute.			
3. The water to be used for mining, milling, and domestic purposes. Irrigation, power, mining; industrial, etc. If for stock state number and kind of animals.			
4. The water heretofore permitted for <u>mining</u> , <u>milling</u> , <u>and domestic purposes</u> . Irrigation, power, mining, industrial, etc. If for stock state number and kind of animals.			
Irrigation, power, mining, industrial, etc. If for stock state number and kind of animals. 5. The water is to be diverted at the following point SENNY Section 19.T. 39N. R. 43E. M.D.B. &M. or Describe as being within a 40-acre subdivision of public survey and by course and			
at a point from which the N.E. corner of said Section 19, T.39N., R.43E., M.D.B.&M., distance to a section corner. If on unsurveyed land, it should be stated.			
bears N.48 ⁰ 52'21"E. a distance of 3,817.79 feet.			
5. The existing permitted point of diversion is located within NE% NW% Section 33, T.39N., R.43E., M.D.B.&M. If point of diversion is not changed, do not answer.			
and from which the North ½ corner of Section 33,T.39N.,R.43E.,M.D.B.&M. bears N.			
25 ⁰ 28'E., 1,394.2 feet.			
7. Proposed place of use See Attachment "A" and Place of Use Map			
7. Proposed place of use Describe by legal subdivisions. If for irrigation state number of acres to be irrigated.			
8. Existing place of use Section 19,20,21,28,29,30,32,33,T.39N.,R.43.,M.D.B.&M. Describe by legal subdivisions. If permit is for irrigation, state number of acres irrigated. If changing place of use and/or			
manner of use of irrigation permit, describe acreage to be removed from irrigation.			
manner of use of irrigation permit, describe acreage to be removed from irrigation.			
December 31			
9. Use will be from January 1 to December 31 of each year. Month and Day Month and Day			
10. Use was permitted from January 1 to December 31 of each year. Month and Day of each year.			
1. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and			
specifications of your diversion or storage works.) Well, pump, motor, distribution system. State manner in which water is to be diverted, i.e. diversion structure,			
ditches, pipes and flumes, or drilled well; etc \$200 00000000000000000000000000000			
12. Estimated cost of works: \$200,000.00 Well completed with 12-inch diameter casing to a			
13. Estimated time required to construct works depth of 785 feet. Pumping hardware has been in-			

stalled, along with a continuous reading flow meter.

14.	Estimated time required to complete the ap	oplication of water to beneficial use 3 years	
15.	Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use: See Attachment "Remarks"

		State Engineer	

Abrogated By: Ort, 67736 T 0.25 PORT, 67737 T 0.25 PORT, 67738 T 0.25 PORT, 67738 T 0.25 EXP, 9/12/02 **

(PERMIT TERMS CONTINUED)

The State Engineer retains the right to regulate pumping from the dewatering project and/or any other groundwater withdrawals herein authorized to protect the public interest and existing rights. Any water pumped and not used for mining and milling purposes shall be injected back to the Kelley Creek Groundwater Basin.

The design of the infiltration system or other disposal method and the delivery system to the site shall be submitted to the State Engineer for approval prior to any diversion of water. The permittee shall discharge water in a manner to achieve maximum conservation of the water resource. It is understood that this right must allow for a reasonable lowering of the static water level.

The State Engineer will retain the right to require additional monitoring including; water levels in observation and monitor wells and of the flow rates of surface sources. The permittee, on a schedule acceptable to the State Engineer, shall prepare and present an update on the activities of the mine and the monitoring on a periodic basis, but not less than two times per year.

This permit does not extend the permittee the right of ingress and egress on

public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies and is specifically issued contingent upon approval by the Nevada Division of Environmental Protection of the dewatering project.

The total combined duty of water for consumptive purposes under Permits 49633, 49634, 50853, 50854, 52046, 52048, 52049, 52050, 52051, 58042, 58043, 58044, 58045, 60048, 60049, 60050, 60051, 60052, 60053, 60054, 60055, 60056, 60057, 61132, 61133, 61134, 61135, 61136, 61137, 61138, 61140, 61141, 61142, 61143, 61144, 61798, 61799, 61800, 61801, 61802, 61803 and 61804 shall not exceed 6,121.0 acre-feet annually. The total combined diversion rate of the above referenced permits shall not exceed 30.75 cubic feet per second on an instantaneous basis.

This permit is issued subject to and also incorporates the terms and conditions

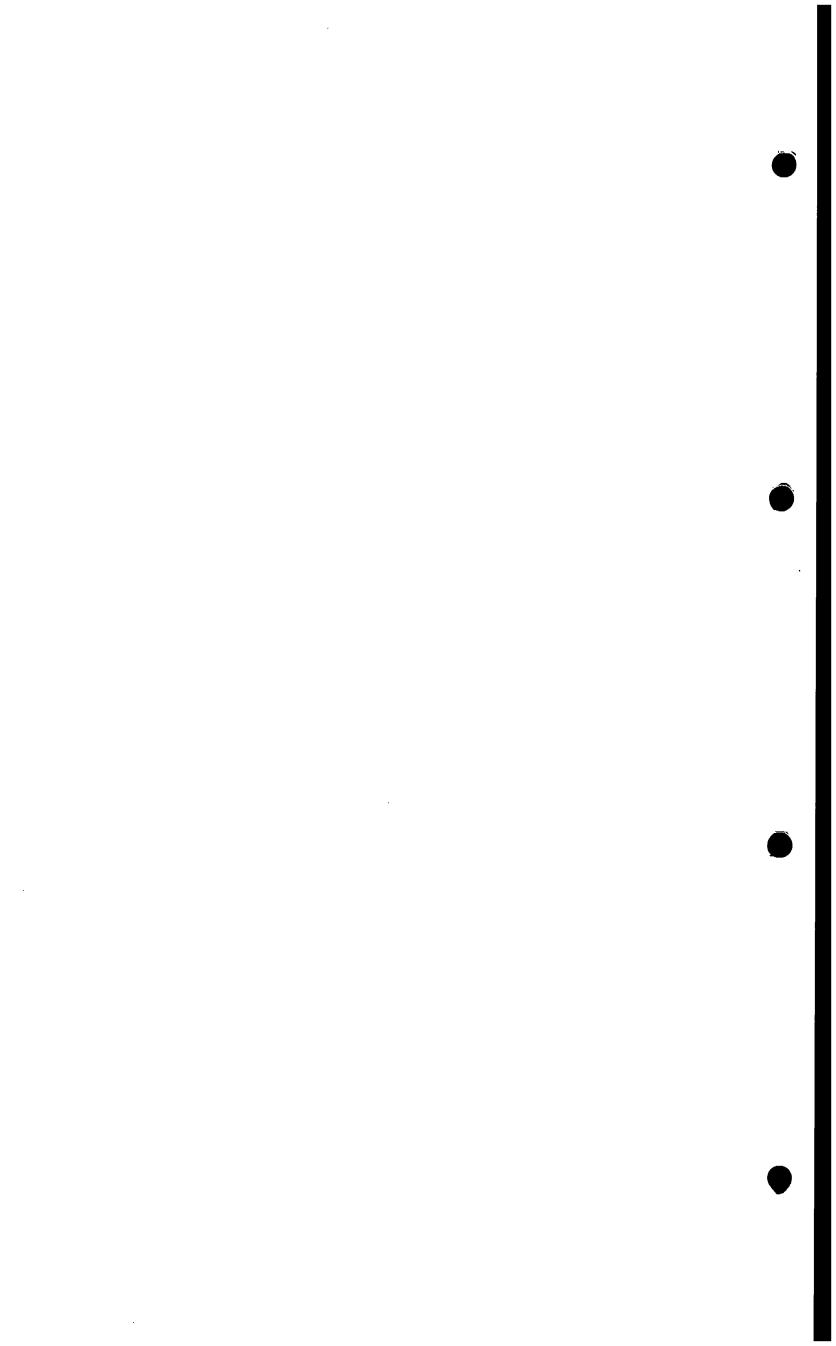

set forth in the State Engineer's Ruling No. 3606, dated May 19, 1989.

Monthly records will be kept of the following: The volume of water pumped from each well, the measurement of pumping water level (drawdown) from each production well and each monitoring well, the volume of water consumptively used for mining and milling uses projectwide, and the amount of water discharged for infiltration. These records will be submitted within 15 days after the end of each calendar quarter. A method that estimates the amount of evaporative losses from the discharge system shall be submitted with the monthly report. The evaporative losses will be considered as part of the combined duty for consumptive purposes.

All of the above stated conditions are issued subject to having no adverse

impacts on existing rights.

Attachment to Application to Change Point of Diversion. Manner of Use and Place of Use of the Public Waters of the State of Nevada Heretofore Appropriated

Remarks: [continued from application] Pumping pursuant to the portion of the base water right described in this application (#52046) is presently occurring at the point of diversion described in this application pursuant to temporary permit no: 61032T. The purpose of this application is to eliminate the need for filing temporary applications on an annual basis by permanently moving the referenced portion of the base water right to the existing effective point of diversion. In the event this application is approved, temporary permit no: 61032T will expire and be instantaneously replaced by this approved permit.
